

Control of Work

Manage Connected Workers and Corporate Safety Programs

with an Advanced EHS Management System

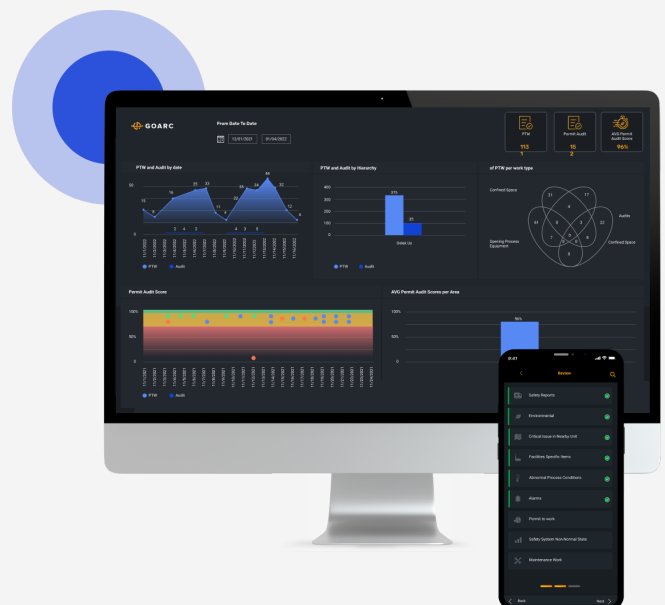

Control, maintain and implement safety programs for people and work processes with aggregated data from all available sources in real time.

With GOARC Safety 4.0® Control of Work, managers and executives can analyze all work processes across the facility and set and monitor KPIs while collecting all the information necessary for reporting processes, anywhere, anytime.

GOARC's dynamic and contextual workflows keep safety managers and executives responsive to potential safety-related risks. Gamification management enables promotion of safe behavior, worker engagement and motivation, and accurate reporting.

Benefits and Features

- Flexible system with various setups, workflows, and dynamic routines
- Best and most effective workflow lowering possible risk and increasing productivity are identified by a deep analysis
- Data support investigation and corrective action
- Customized approval workflows include action tracking, knowledge management, and approval controls
- Data support investigation and corrective action
- Centralized command center with dashboards and interactive reports
- Accurate, integrative and visual data allows to discover gaps, failures and risks

GOARC's Value

Reach Operational Excellence with GOARC's technology

AI & Machine Learning

Artificial intelligence and machine learning to identify and monitor predictive and prescriptive metrics, delivering dynamic routines based on real-time analytics for optimal risk and safety management.

Connected Worker

GOARC's Connected Worker solution enables a full digital view of facility activities, converging personal and process safety with integrated information from all sources enabling fast data-driven decisions at the right time.

Command center

The only centralized command center with real-time data visualized. Combining command, control, communications, computers, and intelligence together in one source for a full digital view of facility operations

Control of Work

Control, maintain and implement safety programs for people and work processes with aggregated data from all available sources visualized in real-time

Permit to Work

Identify most efficient workflow lowering possible risk and increasing productivity

Shift Management

Integrated data-driven shift handover with real-time connectivity, visibility and communication

Lockout TagOut

Enhanced efficiency with a digital, easy to use, holistic, flexible LOTO management solution

About GOARC

GOARC's predictive AI-powered digital safety solutions delivers a real-time view of a plant's operational reality with superior visualization and dynamic work activities and risk management. It connects people and aggregates disparate data from systems, sensors, and the human-derived activities – delivering meaningful, actionable insights across the organization.
